I hereby respectfully urge the FCC to reject the NAB's petition 04-160: satellite radio should be able to provide any type of programming to users willing to pay the subscription fee. Similar to satellite TV, it is the equivalent of being able to offer local channels to its users. Rather than seeking to stifle competition, the traditional broadcasters should devise ways to compete with the service. Please let the free-market system decide which products consumers should be accepting. Thank you. GC.
